

Professional Programmes

Claareyn Gerrymoil

In addition to offering a number of degree programmes and business-focused corporate programmes; The IBS also lends itself perfectly to being a centre for high-level professional qualifications and training.

There are two types of professional programme that we currently offer:

Firstly, there are those that are predominantly delivered and assessed

by our own staff - such as qualifications from the Chartered Institute of Marketing and the Chartered Management Institute.

Secondly, there are programmes that are delivered by external parties. For these programmes, external training providers simply hire rooms from us and periodically send staff across to the Island to deliver training.

Whichever type of professional programme you opt for, you can be assured that The IBS will provide peaceful surroundings and spacious, comfortable facilities in order that your student experience is as positive as possible.

The table below lists the professional programmes currently available at The IBS.
